

MISSION STATEMENT

The mission of American Adult and Community Education Center is to provide the opportunity for all students to receive a quality education that will equip them to compete in our ever-changing, high-tech global society. Through collaboration among disciplines, along with business and community partnerships in education, our center will prepare students to become productive and socially conscious members of our increasingly complex world.

VISION

Our vision is **to have active recruitment, enrollment and retention** of students, targeting early school leavers and those in need of post employment training. As we carry out the school's mission, we see active classrooms filled with students completing programs. Lessons are highly interactive. Specific objectives are set to reach goals. Staff and students attend regularly. Ongoing staff development trains teachers in the new skills necessary to enhance the delivery of instruction to adult learners. The staff is committed to helping adults in our multi-cultural, multi-lingual community develop the life skills required to contribute to the community and the work force.
